

# ALLALI Fadoua | Full stack Developer

Email : 3allalifadoua@gmail.com

Phone : +213 778 659 963

Location : Bordj Menaïel, Boumerdès

Portfolio : <https://fadoua-allali-portfolio.netlify.app/>

## Objective :

Driven by curiosity and innovation, with hands-on expertise in React, Vite, and Tailwind CSS (front-end) and NestJS, Prisma, and PostgreSQL (back-end), comfortable working with Redis, MinIO, and Docker to build clean, scalable architectures. Eager to contribute to impactful projects while continuously expanding my expertise.

## Education :

### Master's Degree in Information Technology

University of M'Hamed Bougara Boumerdes | 2025

### Bachelor's Degree in Information Systems and Software Engineering (ISIL)

University of M'Hamed Bougara Boumerdes | 2023

## Professional experience:

- Backend Developer — SADEEM INFORMATIQUE February – June, 2026
  - Developed the backend of 2 enterprise web applications using NestJS, delivering 100+ RESTful API endpoints, including role-based access control (RBAC) for user/role/permission management and admin dashboards with statistics.
  - Integrated external services such as OTP-based authentication for secure user verification.
  - Contributed to 3 software projects within an Agile team of 6+ developers and participated in 15+ code reviews.
  - Managed 75+ database tables using Prisma ORM, containerized services with Docker, and fixed 60+ backend issues.
- IT Discovery Intern — SOFICLEF (Si-Mustapha) January, 2024
  - Observed IT operations and gained practical knowledge of security procedures, data backup, and system maintenance.
- IT Intern — SONELGAZ (Boumerdès) March – May, 2023
  - Assisted the IT department with software development, technical support, troubleshooting, and system maintenance.

## Projects :

- IT Asset Management System — SONELGAZ (Boumerdès) 2023
  - Bachelor's final-year project: Developed a web application for managing IT assets and equipment.
  - Technologies: React.js, Node.js, MySQL
- SQL Mirror 2024
  - Developed a web-based relational database management system (RDBMS) simulator for managing databases, tables, and attributes.
  - Technologies: React.js, Node.js, MySQL
- Mehneti (Startup Project) 2025
  - Master's final-year project: Developing a web platform that connects job seekers with recruiters to simplify the recruitment process.
  - Technologies: React.js, Node.js, MongoDB

## Certifications :

- Startup Incubation Certificate — Business Incubator, Boumerdes July, 2025
- Backend Development Certificate — BrainerX School, Algiers November, 2024
- Office Computing Certificate — Informica School, Boumerdes August, 2024
- Frontend Development Certificate — Khadmoney School, Algiers September, 2022
- UI/UX Design Certificate — Khadmoney School, Algiers September, 2022

## Skills :

### Personal Skills

- Front-end: React.js, Vite, Tailwind CSS
- Back-end: NestJS, Prisma ORM, PostgreSQL
- DevOps: Docker, Redis, MinIO
- Tools: Git, Swagger

### Professional Skills

- RBAC & User Management
- RESTful API Development
- Database Design & Management
